

Classroom News

Ms Fernando (Years 1-2)

The Year One and Year Two classes have been enjoying all of their mathematics activities. In maths this term we have been working hard on place value and time. This is one of the class's favourite games in which they need to identify tens and ones. We love working together and learning new skills.

We have also been working hard on learning to sound out our spelling words and practising how to write them. One of our favourite activities is rainbow writing especially with the scented markers.
